CHOOSING PAINT COLORS

go from **color blocked** to **color confident**

If you start off excited about creating a new look — but hit a wall when it comes to choosing the paint color — you're not alone, say Ace's Design Experts. Get beyond the block with professional advice that will boost your color confidence.

> PICK 1 COLOR

"If you start by grabbing stacks of paint chips, you can overwhelm yourself with choices," says Katie Reynolds, Interior Designer and Ace's Design Expert from Dallas, TX. **"Instead, learn how to zero in on the right color."**

First, ask yourself how you want the room to feel. Focus on identifying which color will create the right mood for your space. Leave decisions about the specific value, tone or shade of a color for later.

- Calming — Blues, Greens
- Energetic — Reds, Oranges, Yellows, Pinks
- Regal — Purple
- Glamorous — Deeper, warm undertones of any shade
- Tranquil — Lighter, less saturated versions of any shade
- Cohesive — Neutrals. Choose a warm or cool undertone to set the mood.

See Ace's Design Expert Katie Reynolds' tips for deciding what color to paint a room.

About Ace's Design Experts

Due to differences in monitors and printers, the colors shown here may vary from the actual paint colors. Please refer to the color swatches at Ace Hardware stores for a more accurate color presentation.

"Choose a color based on how you want the room to feel."

CHOOSING PAINT COLORS

go from **color blocked** to **color confident**

CHOOSE 3-5 PAINT CHIPS

Once you decide on a color, focus on five or fewer paint chips of that color, based on lightness and brightness.

- **Lightness** (a.k.a. the color value) is based on how much white is added to the color. White reflects more light, so lighter values create an airy feel. Go 1–2 shades lighter or darker than furnishings or flooring, depending upon the mood you want to create.

CHOOSE 1-3 TEST COLORS

“Sometimes a color looks great in a friend’s house, or even in the store, but seems different on your walls,” says Julie Richard, Interior Designer and Ace’s Design Expert from Boston, MA. “Before you choose colors to test, it helps to understand what affects color’s appearance, so you can picture how it will look in your home.”

Reflection

- Glossy sheens and surfaces reflect more light. Color will appear a touch more vibrant.

Adjacent Color

- Surrounding objects and surfaces can make a color pop, recede or can draw out undertones of other colors.

Room Size

- Deep, dark values and brighter color are amplified — in a large room because there’s so much more of it and in a small room because it will bounce around.
- With high ceilings, you can go bolder without feeling closed in.

- **Brightness** is about the intensity or saturation of the color. White isn’t diluting the color so it absorbs light. The result is a sense of energy in a room.

Look for undertones of other colors, too. Holding a blue chip up on its own, you may not notice if it has a subtle purple tone. But once it’s up on a large expanse of walls, that subtle hint of another hue will be amplified. To detect these hues, hold the chip next to your furnishings, inspiration pieces or contrasting colors to see what comes through.

Lighting

- Eastern and southern facing rooms get the most sunlight. Colors seem brighter and warmer.
- In northern or western facing rooms, the color temperature runs cooler. Tones of blue and green come through more.
- When daylight fades, color changes even more with artificial lighting. Paint your test color on the walls and look at it with the shades and blinds wide open. You’ll see the color in its brightest state of intensity. You’ll notice which tones come through the strongest.

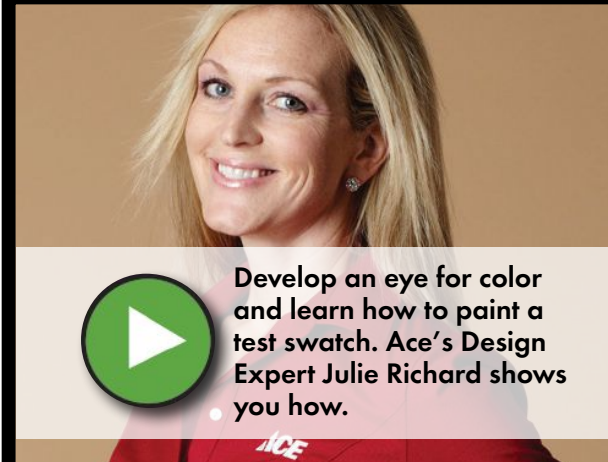

About Ace’s Design Experts

Due to differences in monitors and printers, the colors shown here may vary from the actual paint colors. Please refer to the color swatches at Ace Hardware stores for a more accurate color presentation.

“Light reflection, room size and surrounding colors affect a color’s appearance”

Develop an eye for color and learn how to paint a test swatch. Ace’s Design Expert Julie Richard shows you how.

CHOOSING PAINT COLORS

go from **color blocked** to **color confident**

▶ COMPLETING YOUR LOOK

"When your colors are harmonious, your new look becomes about so much more than a coat of paint," says Nathan Fischer, Interior Designer and Ace's Design Expert from Orange County, CA. "It signals the occupants to be at ease and stimulates talking and engagement."

Use these tips to create balance with 1–2 complementary colors for the room:

- **Balance Color Proportions** — Walls or cabinetry should make up about 60 percent. Floor, window coverings or ceilings make up 30 percent. Accent items make up 10 percent.
- **Try Pre-selected Colors** — Brochures with color combinations that work together are usually chosen by designers. Your work is done for you!
- **Look to Nature** — Look outdoors for examples of colors working together as dominant and accent colors. You can't go wrong choosing a palette that's inspired by your surroundings.
- **Try a Color Wheel** — Choose colors opposite one another, side-by-side, or in different values of the same color for a complete look.
- **Draw Inspiration from a Prized Item** — Choose a dominant color and 1–2 complementary colors from a textile, work of art or even a piece of jewelry you love.

About Ace's Design Experts

Due to differences in monitors and printers, the colors shown here may vary from the actual paint colors. Please refer to the color swatches at Ace Hardware stores for a more accurate color presentation.

Nathan Fischer, Ace's Design Expert, explains how to choose colors that go together.

"Notice how colors work together in your favorite objects or your surroundings."

Harvest Style

- Butterfly 3016
- Smoked Paprika 4048
- Autumn Gourd 5018

Winter Whites & Lights

SWITCHEROO

Switch your bulbs. Swap your switches.

YOU'LL NOTICE THREE THINGS WHEN YOU SWITCH FROM INCANDESCENT LIGHT BULBS TO LEDs OR CFLs:

- 1> You're saving energy.
- 2> You're not replacing light bulbs as often.
- 3> Your energy efficient bulbs won't work right from your dimmer switch.

That's right. The dimmer switches we have in our homes today weren't designed to handle LED or CFL technology — even the ones labeled “dimable.” Put an energy-saving bulb into a fixture wired to a dimmer switch and it may flicker, shut off or won't dim or brighten as much as the old bulbs.

A *universal* dimmer switch is compatible with LED and CFL technology and it's very easy to install — even for a beginner.

See How to [Swap Your Switch](#)>

By 2014, incandescent light bulbs will be phased out of production. Find out more.

CHECK THE LABEL

Only “dimable” LED or CFL bulbs are ... well ... dimable.

YOU CAN DO THAT with a **ROTARY TOOL?**

Anyone who has a rotary tool knows, it's easier to list the things you can't do with one, than name all the things you can do.

Take the elbow grease out of maintenance projects and have time for some fun projects like these:

Watch acehardware.com for more Dremel Monthly Projects!

Click the project photos for simple-to-follow instructions.

SPEED CLEAN THE GRILL

CREATE A TRAY CHIC HERB SOLARIUM

UPCYCLE PVC PIPES FOR STORAGE

FIX A BROKEN TILE

MAKE AN OUTDOOR FIREPLACE

WHO NEEDS a **ROTARY TOOL?**

Join the rotary club!
You've got to have one of these if you:

- ... live in an apartment or condo
- ... are a crafter or hobbyist
- ... have a honey-do list
- ... have hand and power tools to maintain
- ... have silver or brass to polish
- ... are beginning to build up your collection of tools
- ... have limited space or budget for tools
- ... aren't comfortable with bulky power tools

10

MUST-HAVE for your holiday handy work!

Earn **\$50*** in Ace Rewards points when you spend \$500 within 60 days of account opening

Plus a great LOW intro rate!

0% intro APR** on purchases and balance transfers for first twelve billing cycles, thereafter a variable APR, currently 13.99%–22.99%.

APPLY NOW!

www.acerewardsvisa.com/ar93209

Offer valid October 1–December 31, 2013.

*New Cardmembers will receive 25,000 Ace Rewards points after \$500 in net purchases (purchases minus credits and returns) are made within 60 days of account opening. 25,000 Ace Rewards points equals a \$50 Ace Reward. The 25,000 Ace Rewards points will be applied to your Account within two billing cycles after the \$500 in net purchases is made. Ace Rewards are redeemable at participating Ace Hardware stores. To be eligible for the 25,000 points, you must complete and submit an application available at your Ace store with a valid date of 10/1/13–12/31/13. Your Account must remain open, have available credit and be current (no minimum payment past due) to qualify.

**The 0% introductory APR applies to purchases and balance transfers and is valid for the first 12 billing cycles. The introductory rate does not apply to cash advances. Thereafter, the APR may vary and as of 10/01/13, the undiscounted variable APR for Purchases and Balance transfers is 13.99%–22.99% (based on your creditworthiness). The variable APR for Cash Advances is 23.99%. Cash Advance fee: 4% of the amount of each advance amount, \$5 minimum. Convenience Check fee: 3% of the amount of each check amount, \$5 minimum. Cash Equivalent fee: 4% of the amount of each cash amount, \$10 minimum. Balance Transfer fee: 3% of the amount of each transfer, \$5 minimum. There is a \$2 minimum interest charge where interest is due. The annual fee is \$0. Foreign Transaction fee: 2% of each foreign purchase transaction or foreign ATM advance transaction in U.S. Dollars. 3% of each foreign purchase transaction or foreign ATM advance transaction advance in a Foreign Currency. We apply your minimum payment to balances with lower APRs first. Amounts paid over the minimum payment will be applied in the order of highest to lowest APR balances. We may change APRs, fees, and other Account terms in the future based on your experience with U.S. Bank National Association and its affiliates as provided under the Cardmember Agreement and applicable law.

The creditor and issuer of the Ace Rewards Visa Card is U.S. Bank National Association, pursuant to a license from Visa U.S.A. Inc. and the card is available to United States residents only. ©2013 U.S. Bank. All rights reserved.

When your toilet's on the fritz, figuring out the cause can seem like major detective work. Ace's Home Expert Lou Manfredini rounded up the usual suspects — so you can solve the problem yourself.

The USUAL SUSPECTS

— EASY WAYS TO FIX A BROKEN TOILET

▶ SEE **ALL TOILET REPAIR TIPS**

Lou Manfredini,
Ace's Home Expert

CLUES:

- Water keeps running.
- High-pitched, whining noise.
- Noise stops when you jiggle the handle or hold down the flapper.

CULPRITS:

- Clean the flapper with a scouring pad. It may not be sealing tightly.
- Loosen the chain. It may be too tight, holding the flapper open.
- Replace the flapper. Bring in your old one to match the right size.
- Cut back the fill tube. It should sit in the overflow pipe above the water line.

CLUES:

- Bowl overflows.

CULPRITS:

- A clog. To stop an overflow, pull off the tank lid and lift the float arm or turn off the water supply. Then, clear the clog.

CLUES:

- Leaking water under the tank.
- When you drop leak detection tablets in the tank, the water in the bowl is tinted within 30 minutes.

CULPRITS:

- Damaged tank-to-bowl gasket. Replace the part.

CLUES:

- Leaking bowl.
- When you drop leak detection tablets in the bowl, colored water seeps out within 30 minutes.

CULPRITS:

- Cracked bowl. You can't patch it. You'll need to replace the whole toilet.

CLUES:

- Toilet won't flush.
- You have to hold down the handle to flush.

CULPRITS:

- Wrong size flapper. A 2-inch flush valve drain opening is common. Some toilets have a 3-inch flush valve. Measure yours and replace it with the right size flapper.
- Slack in the chain. Tighten it up so the flapper can open.
- Tank water level needs to be reset. Bend the arm on older style floats or twist the float cup on newer fill valves to adjust the water level.
- Broken arm connecting the flush lever to the flapper chain. To remove it, turn the nut in the tank clockwise with pliers and replace the part.

CLUES:

- Leaking water on the floor or ceiling under the toilet.
- Sewer smells.
- Damaged flooring.

CULPRITS:

- Damaged wax ring. Replace it to re-seal the bottom of the toilet to the floor.
- Loose tank-to-bowl screws. Tighten the nuts, but not too much! If you crack the porcelain, you'll be replacing the whole toilet.

CLUES:

- Flapper wears out frequently.

CULPRITS:

- Drop-in tank cleaners. Look for a chlorine-resistant flapper. Or, switch to an in-the-bowl cleaning system.

CLUES:

- Tank won't fill.

CULPRITS:

- Damaged supply line. This brings water in from your main plumbing system. If it's kinked, replace it.
- Water supply is shut off. Twist the valve counter-clockwise to open it.
- Fill valve is shot. Replace it with the same parts you have, or install a newer water-saving device.
- Incoming water supply is obstructed. Call a plumber.

Mind the **GAP:** With Weatherstripping and Caulk

Peel-and-stick foam weatherstripping seals out drafts while still allowing you to operate your window.

Sealing gaps and cracks around your home is an easy way to save energy, prevent water damage and keep pests from moving in. Knowing when to use caulking and when to use weatherstripping is the trick.

CAULKING

Used around non-moving spaces in your home — like trim, pipes and vents.

WEATHERSTRIPPING

Used around areas that move or open — like doors and windows.

 **SEEHOWTOINSTALL**
Caulk and Weatherstripping

 **SEEMORETIPS**
on using a caulk gun

Tack a metal or acrylic door sweep in place for a more permanent way to seal out drafts around exterior doors.

Use caulk to seal gaps and cracks around areas like your trim. Drafts, critters and water can creep in and cause damage.

Caulk Tips!

Never seem to get that perfect bead of caulk? The secret may be in the caulk gun you're using. It's easier to get a nice smooth bead of caulk if your caulk gun has a continuous flow feature than it is with a ratcheting type caulk gun.

FLIGHT

OF FANCY

Attracting birds to your yard

Bird seed, suet, nuts, fruit or nectar help birds when food is scarce or when extra energy is needed during migration. The more variety you provide, the more types of birds you'll attract.

Create a rest stop for birds and you'll be rewarded with a cheerful flash of color and flurry of activity in your yard on dull winter days.

Just follow these simple tips for providing water, shelter and food.

Bird Baths:

- Place one about 15 feet from areas where predators can easily hide.
- Keep the water fresh and the bath clean.
- Use an immersion heater in cold climates to keep ice from forming.

Bird Houses:

- Choose the right-sized entry for the type of bird you'd like to attract.
- Hang on a pole, hook or branch, about 5 feet off the ground. Some birds prefer higher or lower nests.
- Hang a mesh bag nearby. Fill it with nesting material like twigs, short string or bits of cotton.

Feeders:

- Use shepherds' hooks, poles or hangers to hang feeders at different heights.
- Shelter feeders from the elements, but not too near spots where predators might be hiding.
- Keep them full. Birds quickly move on to another spot where more food is available.
- Use quality seed. It contains less filler and more nourishment.
- Use the right feeder for the food.

TIME OUTS FOR FIRE SAFETY

Your daily routine is full of dozens of safety precautions that take just a few seconds: lock the door, buckle up in the car, clean up spills and hold the stair railing.

So why not take time out to work some fire safety precautions into your routine? You'll help protect your family, pets and belongings from some of the most common causes of home fires.

▶ SAFETY TIPS

1

FIRE EXTINGUISHERS

Learn how to use one. Find out where to keep them in your home.

3

DRYER VENT

Clean your dryer vent at least once a year.

2

SMOKE ALARMS

Test and replace batteries regularly. Replace detectors that are 8-10 years old. Install them in the right places. Make sure you have both smoke and flame sensing alarms.

16

Lou Manfredini,
Ace's Home Expert

homeplace 2013 **ACE**
The Home Place

For the seventh year, thanks for the hardware.

Ace Hardware has ranked “Highest in Customer Satisfaction with Home Improvement Retail Stores” according to J.D. Power, thanks to you.

Ace Hardware received the highest numerical score among retail stores in the proprietary J.D. Power & Associates 2013 Home Improvement Retail Store StudySM. Study based on responses from 4,129 consumers measuring six stores and opinions of consumers who purchased a home improvement product or service within the previous 12 months. Proprietary study results are based on experiences and perceptions of consumers surveyed January–February 2013. Your experiences may vary. Visit jdpower.com.
